

# DEMATRON

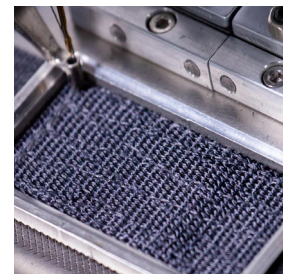

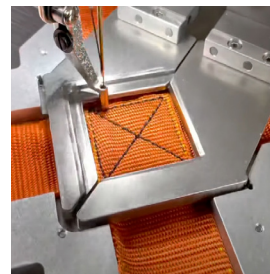

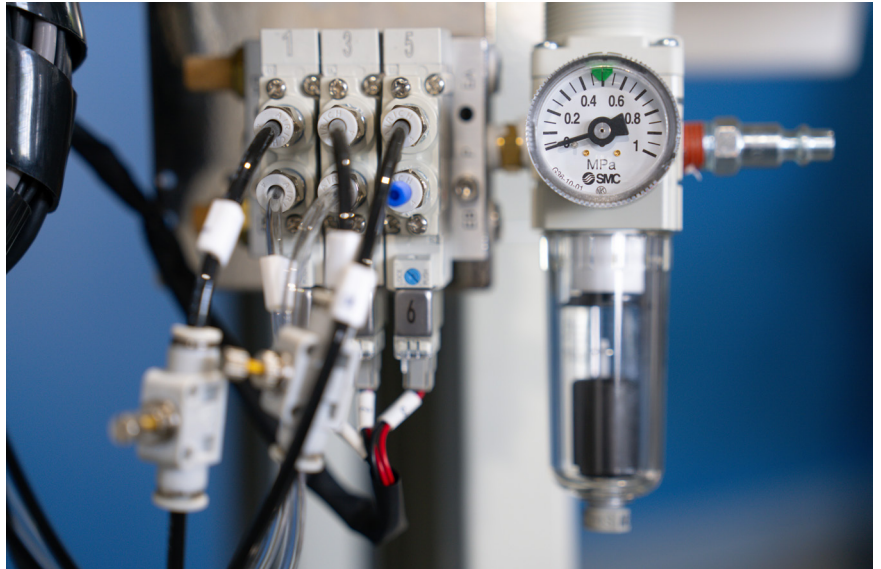

The Dematron DM-1010 offers 3.96" x 3.96" sew area and is able to handle a wide range of fabrics and materials suitable for various applications.

## Sewing Made Easy

The Dematron DM-1010 is unrivaled and fully programmable with many standard features to help you automate the sewing process of various applications. It is equipped with state of the art stepping motors and built-in encoders for precise stitching and quality seams. The DM series also includes intuitive external cad software for stitch digitizing and sequence mapping along with engineering parameters.

Easy to operate and designed with functionality at it's core. The DM-1010 is networkable, USB capable and equipped with 8" on-board programmer to edit and create programs efficiently. It's head is oil-free and features programmable presser foot, Japanese components, thread break sensor, improved sewing, and increased needle penetration all while delivering lower power consumption, higher speeds and maximum efficiency.

Flexible financing options available. Additionally, Dematron offers a 2-Year Warranty and US based support.
